Consideriamo  $f: \mathbb{R}^3 \to \mathbb{R}, \, f(x,y,z) = y \sin(x) + z^2$ .

- a. determinare  $sup_{\mathbb{R}^3}f$  e  $inf_{\mathbb{R}^3}f$
- b. determinare massimi e minimi locali e globali, nel caso esistano.
- c. determinare i punti di massimo e minimo locale e globale, nel caso esistano.

e) 
$$\lim_{X \to Z} \frac{1}{2} \sin(X) + Z^2 = \pm \infty$$

$$\lim_{X \to Z} \frac{1}{2} \sin(X) + Z^2 = \pm \infty$$
